My comments	<p>Section 2: Forest operation planning and management</p> <ol style="list-style-type: none">1. All native forests must be managed for bio-diversity and habitat protection in the first instance.2. Koala habitat must be a priority for protection3. Logging any native forest after the Black Summer fires is questionable; species recovery and habitat protection must be top priority.4. Paying landowners to manage forests for biodiversity and habitat protection would be preferable to logging them.5. Acknowledging the role logging plays in exacerbating wildfire and risk managing appropriately is crucial.
