## Opportunity for landholders to receive funding for healthy soils and productive pastures.

The *Healthy Soils, Productive Pastures* project is funded under the Federal Government's *National Landcare Program* and aims to increase awareness and adoption of best practice land management to help improve and protect the condition of soil, biodiversity and vegetation.

Grants of up to \$10,000 will assist landholders in their agricultural production through a combination of activities that focus on improving soil health, pasture condition, native vegetation and biodiversity on-farm while reducing soil erosion. Activities such as fencing stock from waterways with alternate water systems, internal paddock division to enable rotational grazing and pasture management and planting natives for shade and shelter belts.

If you are interested in applying for a grant, please contact Linda Hanlon on 0400 454 680 or via email [linda.hanlon@lls.nsw.gov.au](mailto:linda.hanlon@lls.nsw.gov.au)

This project is supported by Greater Sydney Local Land Services, through funding from the Australian Government's National Landcare Program.
