

Condition and utilisation report: January-March 2023

North West Local Land Services | Travelling stock reserves

Monitoring

Condition

48 condition assessments, including 5 Management Agreement Permits areas, were completed for the quarter with 67% in the 'Excellent' condition category. 6% of reserves were assessed as unsuitable for grazing.

Quarterly pasture growth rates

Low - Moderate in the western areas, particularly south of Walgett. Up to 500kg/ha in eastern section of the region.

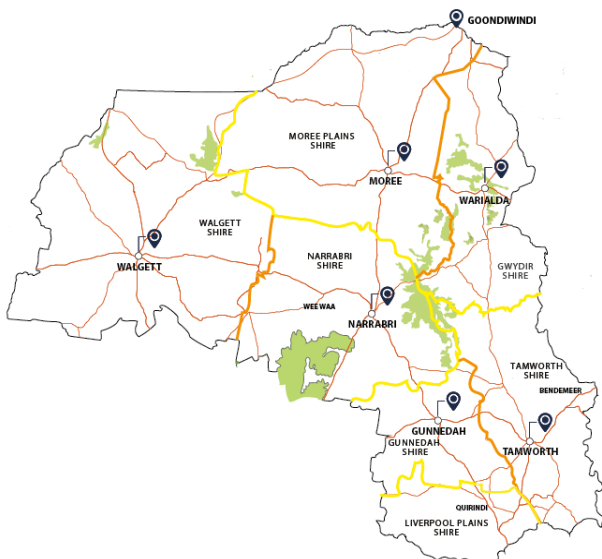

*Pasture biomass - Low - Moderate

Total standing dry matter up to 500 kgDM/ha (Aussie Grass).

*North West Local Land Services targets a pasture biomass of **1200kgDM/ha** or pasture utilisation levels above **10cm** as suitable for grazing.

Ground cover - Good & Stable

Groundcover levels remain high and above critical thresholds across the region.

Combined Drought Indicator - Stable

All of the North West Local Land Services region in the 'Non-Drought' category.

Local Government Area	Groundcover %	Pasture Biomass (kgDM/ha)	Condition Rating
Tamworth Regional	80>	2,000>	Excellent
Liverpool Plains	80>	2,000>	Excellent
Gunnedah	80>	2,000>	Excellent
Gwydir	80>	2,000>	Excellent
Narrabri	80>	2000>	Excellent
Moree Plains	80>	1,500-2,000	Good
Walgett	60-79>	1,500-2,000	Good

Status of uses

Short term grazing permits - will only be allowed where enough groundcover and pasture biomass is available as determined by the travelling stock reserve (TSR) Ranger.

Roadside grazing permits - North West Local Land Services permits roadside grazing use

after the stock owner receives approval from the local Council. *(Please note: Roadside Grazing Permits attract a permit fee)*

Routine Stock Movements permits (RSMP) - permits remain in place.

Management Agreement Permits – remain in place.

Walking Stock permits – Increased to a maximum 1,000 dry cattle or 6,000 dry sheep. More information available [here](#) or www.lls.nsw.gov.au/regions/north-west.
