Do you want your submission marked as confidential? *	No
Do you want to receive future notifications and updates on the PNF Review? *	No
Which of the following best describes you? *	Environmental organisation
Which draft PNF Code are you providing a submission on? *	All Codes

My comments

I think that Private Native Forestry should require a Development Application like all other large developments to ensure full environmental assessments and to give the local community a chance to raise their concerns.

· There must be surveys for threatened species before logging so they can be protected.

· Local Land Services must ensure there is accurate and ecologically credible mapping of, and full protection for, Threatened Ecological Communities, rainforest, oldgrowth forest, wetlands, heathlands, and rock outcrops, along with buffers.

· At least 20m logging exclusions should be implemented around all streams, both mapped and unmapped.

· Logging must be excluded from steep slopes over 25o.

· All trees over 80cm diameter (dbh) must be protected.

· Retained nectar feed trees must be large healthy mature trees.

· The proposed increase in logging intensity must not proceed.

· Clearfelling must not be allowed.

· Weeds must be managed and regeneration assured.
