My comments	<p>The Ecological Crisis, The Collapse of the Ecology, the collapse of the inter-related, inter-dependent life forms on this planet, is the ecological imperative for change. We must change. We must regenerate the ecology urgently.</p> <p>what remain of the native forests must not be logged, the protected areas aren't inclusive enough. All native forests are ecologically important bio-assets which must not be logged.</p> <p>The codes of practice are permission-booklets for taking trees, for the continuing destruction of the ecology here in NSW Australia.</p>
