

## Greater Sydney Local Land Services

# Wild dog and fox control program

Dear neighbours,

Greater Sydney Local Land Services will be leading a wild dog and fox control program in the Hawkesbury, Hills, Hornsby and Blue Mountains areas as a result of strong support from local landholders.

The high number of properties involved has been critical to achieving the best outcomes and is crucial to the success of the program implementation.

This program is part of our ongoing work to reduce pest numbers and impacts on primary production and native wildlife in these areas.

The below landholders are participating in the current program and will be laying 1080 wild dog and fox ground baits and 1080 Canid Pest Ejectors on the listed properties. The program will commence on the **30 September and run until 28 October 2020. Please restrain all domestic pets and working dogs during this time.**
