Which of the following best describes you? *	Agricultural Industry
Which draft PNF Code are you providing a submission on? *	Northern NSW

My comments

Dear LLS,

RE Section 2.2 Forest Stewardship Plans

There are two points of feedback regarding the addition of such a plan (which is an excellent step forward in the sustainable management of our native forests).

Firstly how will this be paid for - is the cost to be bared by the landowner or will LLS cover the cost. In this how will this work if the landowners engages a private consultant to put together a plan.

The second point relates to the ongoing management of the forest, particularly in regards to advice about ongoing silviculture options. There is a note (2.2 (b) (v) + (vii)) stating what the post-harvest basal objective area and activities that promote forest regeneration, however perhaps what is also needed are a set of scenarios of different harvest actions based on factors such as logging density, logging rotation length and inter-logging maintenance. Such scenarios could be designed around similar forest types and so reduce the need for each person having to have an individual plan made up?
