

Dog trapper at your place — for free!

Identify wild dog signs on your property with a professional wild dog controller, with all expenses covered by Western Local Land Services

Do you want to know how to identify wild dog signs and what techniques are available for control? Are you concerned about the threat of wild dogs? Are wild dogs maiming and killing your livestock?

If you answer yes to any of these questions and you are a landholder in the Western Local Land Services region, you should immediately contact your local biosecurity officer who can organise for a professional wild dog controller (PWDC) to visit your property to show you how to identify wild dog signs and provide tips on what you as a landholder should be looking out for. The PWDC will also assess your wild dog problem and discuss your control options.

This visit by a PWDC will be at no charge to you, the landholder, thanks to the Professional Wild Dog Controller Program, which has so far seen over 70 wild dogs removed from the landscape over a 12 month period to February 2021.

How can I participate?

Contact your local biosecurity officer or Phil Baird (see contact details below) to express your interest. Please note there is **limited funding available and funding will be spent on a first in first served basis.**

- available to landholders in the Western Local Land Services region
- maximum of one free day with a PWDC per property
- landholder/property manager must accompany the PWDC who will pass on knowledge and advice
- Western Local Land Services to cover all expenses of the day.

Note: This offer is to help raise awareness and improve knowledge of wild dog identification and management. The PWDC will not directly undertake trapping as a part of this offer.

Funding for the PWDC program is through the Federal Government's 'Communities Combatting Pest Animals and Weed Impacts During Drought' Program.
