Do you want your submission marked as confidential? *	No
Do you want to receive future notifications and updates on the PNF Review? *	No
Which of the following best describes you? *	Concerned citizen
Which draft PNF Code are you providing a submission on? *	All Codes

My comments

Private Native Forestry should require a Development Application as all other large developments.

The V process was introduced to allow the local community to raise their concerns. To short-circuit this is to undermine democracy.

Proper environmental assessment should be carried out, and reported publically.

Surveys for threatened species must be conducted before logging, so if present, they can be protected.

Local Land Services must ensure there is accurate and ecologically credible mapping of, and full protection for, Threatened Ecological Communities, rainforest, oldgrowth forest, wetlands, heathlands, and rock outcrops, along with buffers.

At least 20m logging exclusions should be implemented around all streams, both mapped and unmapped.

Logging must be excluded from steep slopes over 25 degrees, otherwise damaging erosion may be triggered.

All trees over 80cm diameter (dbh) must be protected.

Retained nectar feed trees must be large healthy mature trees.

The proposed increase in logging intensity must not proceed.

Clearfelling must not be allowed.

Weeds must be managed and regeneration assured.

Unless the above are implemented, any logging activity may not be represented as 'ecologically sustainable'.
