

# STOP! HELP PROTECT OUR ANIMALS

We all need  
to do our  
bit to keep  
Australia  
safe from  
exotic  
animal  
diseases

## Have you recently been overseas?

Check the Australian Government Agriculture website for further advice before visiting our farm – scan the QR code below for current advice.

Australia currently has a disease-free status for foot-and-mouth disease and lumpy skin disease, however we all need to play our part.

Before entering our farm, please carefully clean your boots and shoes to ensure you are not putting our animals at risk of disease transmission.

## Don't feed or touch the animals

Did you know swill feeding is illegal in Australia?

Meat, animal products and imported dairy goods may contain serious exotic diseases that could devastate our livestock industries.

Swill feeding is the traditional name for the feeding of food scraps to pigs. This practice has caused foot-and-mouth disease outbreaks overseas.

Thank you for helping protect our property!
