**My comments**

I am a small landholder in Goulburn NSW I currently have a conservation order on half of the property and also a "Land for Wildlife" status.

The region I would like to discuss and protect is the Mt. Rae area near Crookwell. I have visited there many times and been fortunate to see the rare yellow dove-tail orchid , also lots of wildlife.

The thing that struck me most of all were the magnificent trees. This is a true and rare valuable forest and should never be logged. I noted on my way through this area there is in fact a logging/ firewood business.

The destruction and loss of habitat is there should be immediately ceased. With the loss of millions of acres across NSW due to bushfires. Loosing more to logging for firewood or wood chipping--must stop.

Please consider the overall environment when making decisions about these forests , especially in the Mt. Rae area

Thank you

Kind regards Doug Rawlinson
